

Project Progress Report:

Below is the progress we made so far on our project:

1) Which tasks have been completed?

- Read through the instructions for text classification project.
- Had few meetings with all group member to understand the requirements and instructions
- Created a Github repository for project, cloned it from original repository and read through Readme.md file
- Analyzed train and test data

2) Which tasks are pending?

- Working on framework to read the file and scan through each JSON document
- Next step is to apply a text classification logic to decide each document as Sarcasm Vs Not_Sarcasm

3) Are you facing any challenges?

- We did not face any challenges as of now
